

IGNACIO SACHETTO

ADVANCED STUDENT OF INFORMATION
SYSTEMS ENGINEERING

PROFESSIONAL EXPERIENCE

Systems Auditor - US Client

PriceWaterhouseCoopers

Buenos Aires - Argentina (Remote)

Associate 2 (June 23' - July 23')

Associate 1 (May 22' - May 23')

I conducted systems audits for prominent global corporations across various sectors, with a particular emphasis on regulatory compliance with the Sarbanes-Oxley (SOX) Act. During these audits, I identified IT risks by implementing critical controls, including change management, user access review, and user provisioning. Furthermore, I was an integral part of international teams, primarily collaborating with professionals from the United States. This experience allowed me to effectively contribute in a multicultural and global environment.

ABOUT ME

I am currently in the final phase of my Systems Engineering degree while continuing my training as a Full Stack Developer and Data Engineer. I have experience in using technologies such as HTML, CSS, PHP, SQL, Javascript, React JS, and Node.js, being proficient in both front-end and back-end development.

Furthermore, I hold certifications related to data analysis, where I have worked with tools like PowerBI and conducted ETL processes. In my role as a Systems Auditor at PwC, I have been a part of dynamic and multicultural teams, conducting audits for some of the world's largest companies. This experience allowed me to strengthen my English communication skills and attain a C2 certification. As a professional, I am actively seeking new opportunities that challenge me and enable continuous growth, both professionally and personally.

ACADEMIC PROJECTS

Quickfood Project

National Technological University (FRVM) | Mar 23' - Present

I am part of the team that develops a real-time, cross-platform order delivery application using technologies such as React, Node.js, and React Native. We apply the Scrum methodology and oversee the entire development cycle, from requirement gathering to final implementation and deployment.
